

Why Barefoot Pellets?

- **Barefoot Pellets** are exceptional in Quality and Consistency as we tightly control the quality and the cleanliness of the raw material used to make pellets.
- **Barefoot Pellets** are made with clean sawdust and other clean wood waste material primarily generated in the manufacturing of various wood products from hardwood lumber.
- **Barefoot Pellets** utilize sawdust from a variety of hardwood species from the renewable & sustainable forests of Pennsylvania and New York. These species include Cherry, Maple, Red Oak, Hickory, Walnut, and White Oak.
- **Barefoot Pellets** are independently tested periodically and meet the standards for super premium pellets as established by the Pellet Fuel Institute.
- **Barefoot Pellets** have superior low ash content due to the quality of the hardwood raw material used.
- **Barefoot Pellets** are extremely efficient in terms of low emissions, clean burning and high heat.
- **Barefoot Pellets** are protected from moisture by our bag hoods which cover all shipments of pellets to our distributors.

*Feel The Warmth
Of Barefoot Pellets*

*Once Barefoot
Always Barefoot*

Located in the scenic Endless Mountains of Northern Pennsylvania, Barefoot Pellet Company manufactures some of the highest quality wood pellets in the industry.
